

BUSINESS ANALYSIS & PERFORMANCE IMPROVEMENT

TMP provides a range of specialist financial and business analysis services to enable you to effectively measure, monitor and improve your financial performance. Our business and financial analysts can provide full analytical support for your operations, planning and business development.

Our team is available to support you on an ad-hoc or continuing basis, to meet your particular needs. We provide expert advice through every stage of the process, from implementing our recommendations to measuring results.

Maximising shareholder value

We understand how important it is for companies to consistently and measurably increase value for investors and shareholders. We help you implement a systematic program and process specifically designed to optimise financial performance and unlock the intrinsic value of your company.

Business planning

Our analysts work with you to develop a robust, practical plan to help your business achieve its potential. We will take the time to understand your objectives and environment in detail, so we can help you to set KPIs that are relevant, challenging and achievable. TMP can also help you set up or improve your existing planning systems and procedures so that you can adapt rapidly to changes in your market and take full advantage of opportunities as they arise.

To optimise management and financial decisions you need accurate, reliable and timely information about your performance, customers and competitors. We help you set up an analytical and reporting framework allowing you to continuously and effectively monitor your performance against KPIs and performance targets. We help you develop a comprehensive, efficient market intelligence gathering system to monitor the behaviour of your customers and competition, so you can respond swiftly and effectively to external changes in your environment.

Performance monitoring and improvement

Using proven techniques, we examine your business, identifying opportunities to more effectively manage operating and capital costs and improve revenues. We help you identify and source the most appropriate, cost-effective financing mix for your business. Our services deliver measurable, ongoing benefits, as our work in identifying, evaluating and optimising your value drivers will yield both one-off and annually-accruing bottom line savings.

All TMP services are also optionally offered on a highly efficient, remote basis, using the latest information and communication technology.
