

MAJOR PROJECTS FINANCIAL ADVISORY SERVICES

TMP Consulting offers a complete range of financial advisory services for the development of major capital and infrastructure projects. We provide dedicated guidance and support at all stages of your project, from conception to construction, and offer specialised advice on Public Private Partnerships (PPPs).

Since 1997, we have been consultant to over \$10 billion worth of major capital and infrastructure projects in the power, water and transportation sectors. Our clients include multi-national companies, governments and multi-lateral development banks who rely on our expert advice to make decisions on major projects that have significant impact on their future risk profile and financial performance.

Why engage TMP?

Major projects inherently involve risk – that can significantly add or erode value. It is vital that you have the specialist skills and experience to help you make the right decisions. TMP can assist you in ensuring that a comprehensive and rigorous upfront financial due diligence evaluations is carried out to mitigate project risks and maximise the value of your project.

The TMP approach

Drawing on our extensive experience we have developed a unique, systematic and robust process for evaluating major projects and minimising risks. Our versatile template allows us to accurately value your project and to identify and quantify the significant financial, commercial and risk management issues associated with major capital and infrastructure projects.

Our approach is highly valued by our clients for its measurable impact on the outcome of their projects. Whatever the size and nature of your venture, our highly adaptable process can be applied to your specific project.

We provide a complete range of services from evaluating project feasibility and financing options, risk mitigation, project tender submission and developing public private partnerships.
